

# Timetable for notified bodies surveys

for the “Study supporting the monitoring of availability of medical devices on the EU market (HaDEA/2021/P3/03)”

Version: October 2023 (2.0)

In the context of the implementation of Regulation (EU) 2017/745 on medical devices and Regulation (EU) 2017/746 on in vitro diagnostic medical devices, the European Commission’s Directorate-General for Health and Food Safety (DG SANTE) – via the European Health and Digital Executive Agency (HaDEA) – commissioned a **study supporting the monitoring of availability of medical devices on the EU market** to a consortium led by the Austrian National Public Health Institute (Gesundheit Österreich GmbH / GÖG), in collaboration with Areté and Civic Consulting.

For this purpose, the study team will collect information and data through **targeted surveys with key stakeholders** which play a crucial role in the availability of medical devices including notified bodies, manufacturers, and authorised representatives (in the case of non-EU manufacturers), as well as in a later stage health service providers and patient representatives. For surveying notified bodies **three different recurring surveys were developed** which alter in content, length, and frequency (small, medium, and large dataset).

**To assist notified bodies in planning**, this document lists all envisaged mailings and deadlines as well as the requested data set for the first and second study year.

**Please note that dates may also be modified due to changes in the project and the legal environment.**

If you have any questions or comments, please feel free to contact us via the e-mail-address [medical.devices@goeg.at](mailto:medical.devices@goeg.at).
